

At Coxygen Global Universities, we offer specialized training in **Haskell** and **Plutus**, the foundational languages for smart contract development on the Cardano blockchain. Through structured programs, hands-on projects, and expert instruction, students develop the practical skills needed to build secure decentralized applications.

As a proud **partner of EBU**, Coxygen Global Universities aligns its curriculum with international standards and best practices, offering students globally recognized certification and access to a broader blockchain education network. MAY 2025 REPORT

JUNE REPORT

**AUTHOR: EZE ONYINYECHI Facilitator at
G015, Nigeria Haskell Plutus Groups...
Haskell Plutus Developer at Wims Cardano...**

TABLE OF CONTENT

- 1.ONCHAIN CREDENTIALS FOR STUDENTS IN G015**
- 2.LIVE SESSIONS WITH STUDENTS DEVELOPERS**
- 3.MEETINGS WITH MR BERNARD S AND OTHER
FACILITATORS**
- 4. LIVE SESSIONS WITH MR SAVIOR AND STUDENTS**
- 5.ACHIEVEMENTS**
- 6.DEVELOPERS SESSION AND SOURCE CODES**
- 7.CHALLENGES**

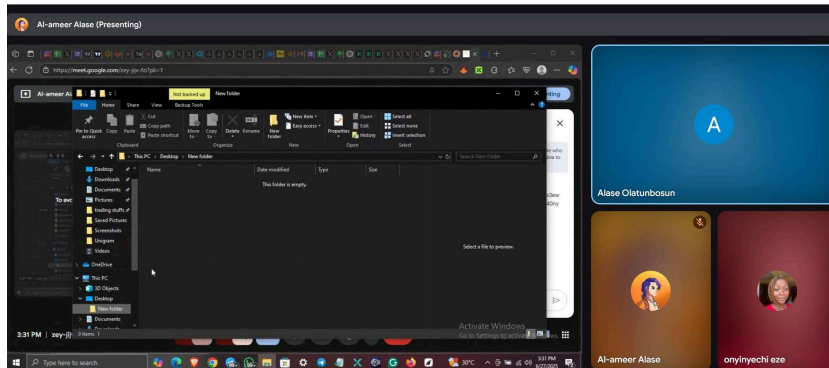

COXYGEN HASKELL PLUTUS GROUP 15

Onchain Credentials:

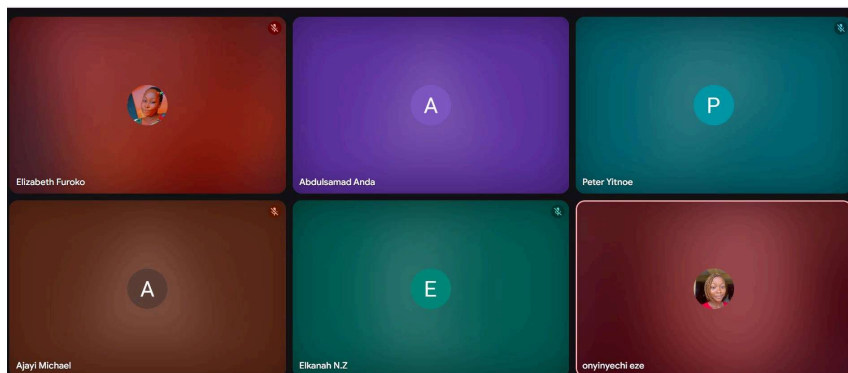

1. On the 26th June, 2025, Damilola Ibrahim did her Onchain credentials

| No | Task Code | Task Title |
|----|------------------|--|
| 1 | HC11102120250626 | HC1-1. Haskell Chapter 1 Practical Tasks |
| 2 | HC51102120250626 | HC5-5. Haskell Chapter 5 Practical Tasks: Improving-and-combining-functions |
| 3 | HC41102120250626 | HC4-4. Haskell Chapter 4 Practical Tasks - Pattern Matching in Functions |
| 4 | HC31102120250626 | HC3-3. Haskell Chapter 3 Conditions-and-helper-constructions |
| 5 | HC21102120250626 | HC2-2. Haskell Chapter 2 Practical Tasks - Data types, Signatures and Polymorphism |

Alase Al-Ameer did his Onchain Credentials

LIVE SESSION WITH G-015 STUDENTS: 27th June, 2025

We started with Introduction to Haskell Programming Language, What are Functions, Examples of Haskell Codes, Job Opportunities

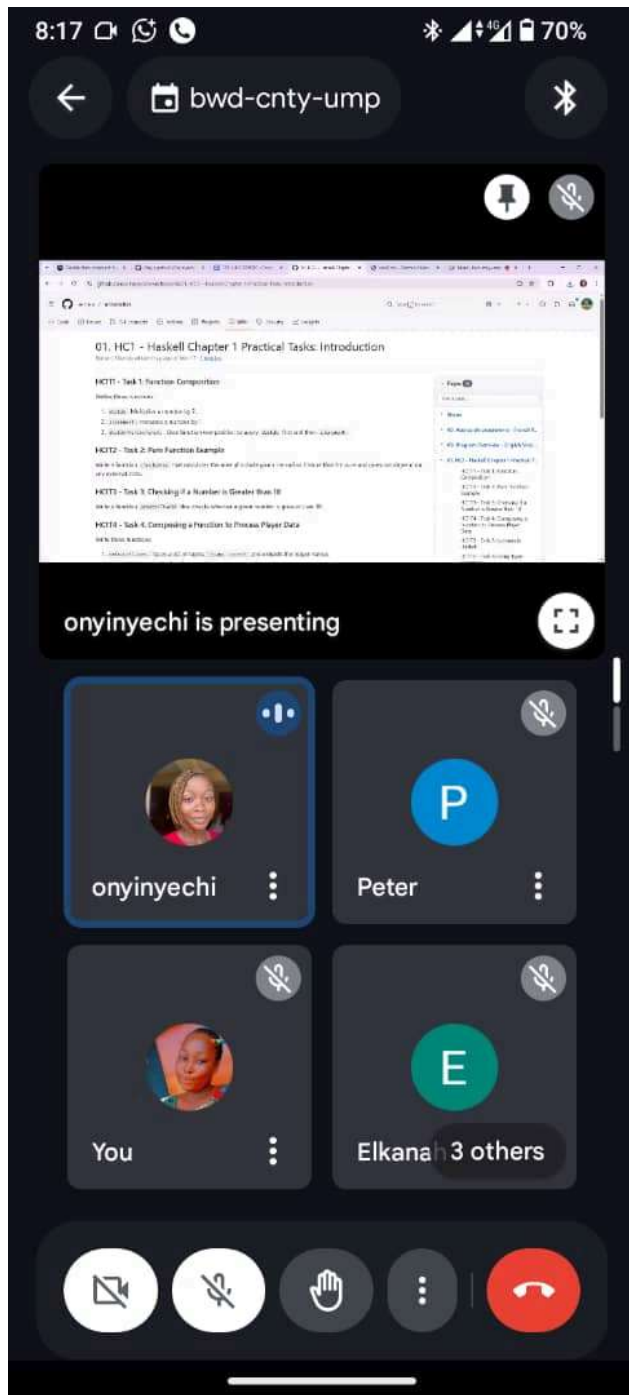

🕒 Time: 8–9PM (Nigerian Time) | 9-10 PM (SAT)

🔗 Join us via the link below every FRIDAYS and SUNDAYS:

<https://meet.google.com/bwd-cnty-ump>

LIVE SESSION WITH G-015 STUDENTS: 27th June, 2025

We discussed Haskell Function Composition, Pure Functions and Real live coding sessions.

🕒 Time: 8–9PM (Nigerian Time) | 9-10 PM (SAT)

🔗 Join us via the link below every FRIDAYS and SUNDAYS:

<https://meet.google.com/bwd-cnty-ump>

MEETING WITH MR BERNARD AND THE FACILITATORS ON 9th June, 2025

🕒 Time: 9;30–2:00PM (Nigerian Time) | 10:30-3:00 PM (SAT)

🔗 Join us via the link below every FRIDAYS and SUNDAYS:

<https://meet.google.com/xtr-vxsa-znx>

MEETING WITH MR BERNARD AND THE FACILITATORS ON 18th June, 2025

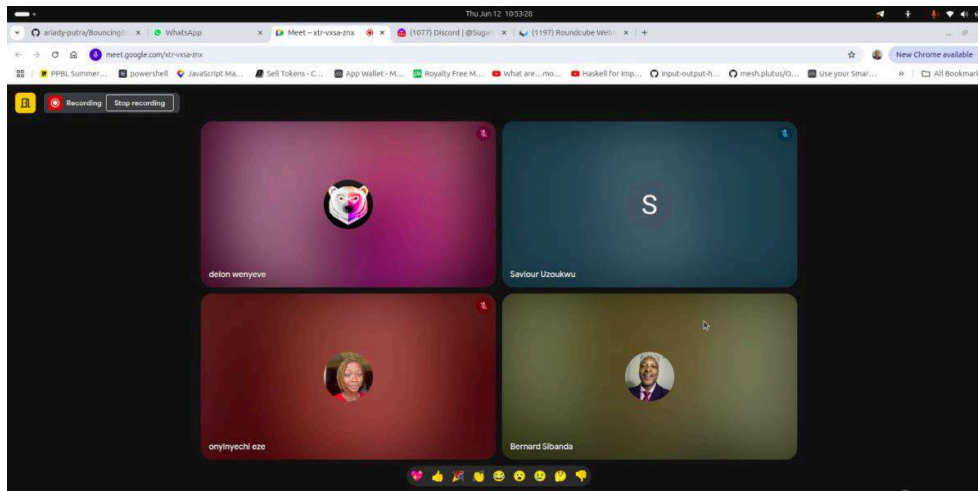

🕒 Time: 9;30–2:00PM (Nigerian Time) | 10:30-3:00 PM (SAT)

🔗 Join us via the link below every FRIDAYS and SUNDAYS:

<https://meet.google.com/xtr-vxsa-znx>

MR BERNARD AND THE FACILITATORS ON 23rd June, 2025

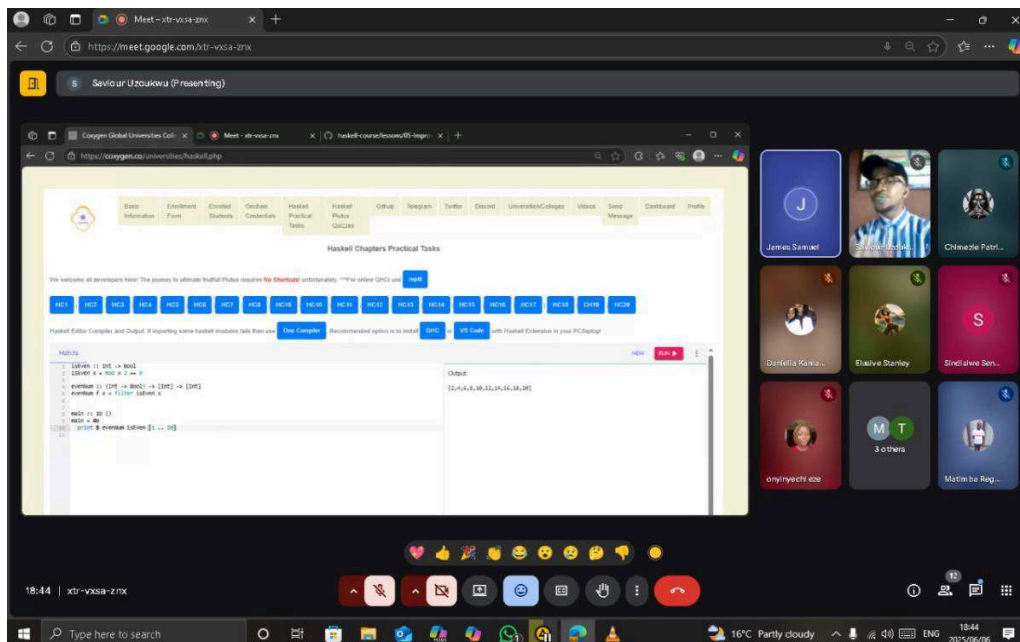

⌚ Time: 9:30–2:00PM (Nigerian Time) | 10:30-3:00 PM (SAT)

👁 Join us via the link below every FRIDAYS and SUNDAYS:

<https://meet.google.com/xtr-vxsa-znx>

LIVE SESSION WITH MR SAVIOUR AND STUDENT DEVELOPERS

⌚ Time: 9:30–2:00PM (Nigerian Time) | 10:30-3:00 PM (SAT)

👁 Join us via the link below every FRIDAYS and SUNDAYS:

<https://meet.google.com/xtr-vxsa-znx>

ACHIEVEMENTS

1. Nine (9) Students have been clarified
2. I studied haskell up till Chapter 7

Developer Session And Source Codes

1. Onchain Governance Marathon

Description: a hands-on coding challenge focused on building a basic decentralized governance system using Haskell <https://github.com/Onyinyechi46/Haskell-Basics>

Goal

Build a lightweight DAO voting engine in Haskell that supports:

-  Onchain-style proposal creation and voting logic
-  Vote tracking per proposal (Yes/No)
-  A voting deadline or timer for each proposal
-  Prevention of late votes after the timer expires
-  Execution logic based on vote results (approve or reject)

(B) Haskell Governance Timer

Description:It provides a precise, customizable countdown utility that can be used during proposal deliberation periods, voting sessions, or task windows in decentralized autonomous organizations (DAOs) or blockchain governance platforms.

<https://github.com/Onyinyechi46/Haskell-Basics/blob/main/Marathons/Haskell%20Governance%20Timer>

2. Mini-Wallet

A simple command-line wallet sign-up system built with Haskell. Users can create wallets with unique usernames and passwords, demonstrating basic I/O, data handling, and user interaction in Haskell. http://commerce_://github.com/Onyinyechi46/Mini-Wallet

3. Cardano-Ecommerce-Sim

Description: A Haskell-based Cardano e-commerce simulation where users buy products with ADA, enjoy limited-time discounts, and receive delivery confirmations. Features smart contract-style logic like balance validation, timed offers, and instant transaction feedback

<https://github.com/Onyinyechi46/Cardano-Ecommerce-Sim>

4. taskFlow

Description: A simple To Do List manager written entirely in Haskell

Welcome, Onyinyechi Eze

 taskFlow

6/29/2025, 4:34:20 PM

Pick due date:

| Sun | Mon | Tue | Wed | Thu | Fri | Sat |
|-----|-----|-----|-----|-----|-----|-----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| 15 | 16 | 17 | 18 | 19 | 20 | 21 |
| 22 | 23 | 24 | 25 | 26 | 27 | 28 |
| 29 | 30 | | | | | |

Add Task

- Onchain credentials

Due: 2025-06-01
- Student enrollment

Due: 2025-06-10
- Session with Mr Bernard

Due: 2025-06-15

<https://github.com/Onyinyechi46/TaskFlow>

THANK YOU
