

■ Monthly Facilitation & Technical Contribution Report

Facilitator: Lesiba Seema

Reporting Period: July 2025

Groups Facilitated: Group G010 & WII Group

1. Executive Summary

In July 2025, I helped run Rido's Group G010 and supported Wil students, working with Deloon to assist the students. I also reached out to students who stopped attending classes to see if they needed help and to encourage them to continue. Additionally, I wrote marathon tasks for chapters 10, 11, and 12 to give students more practice.

Marathon Questions (Chapters 10–12)

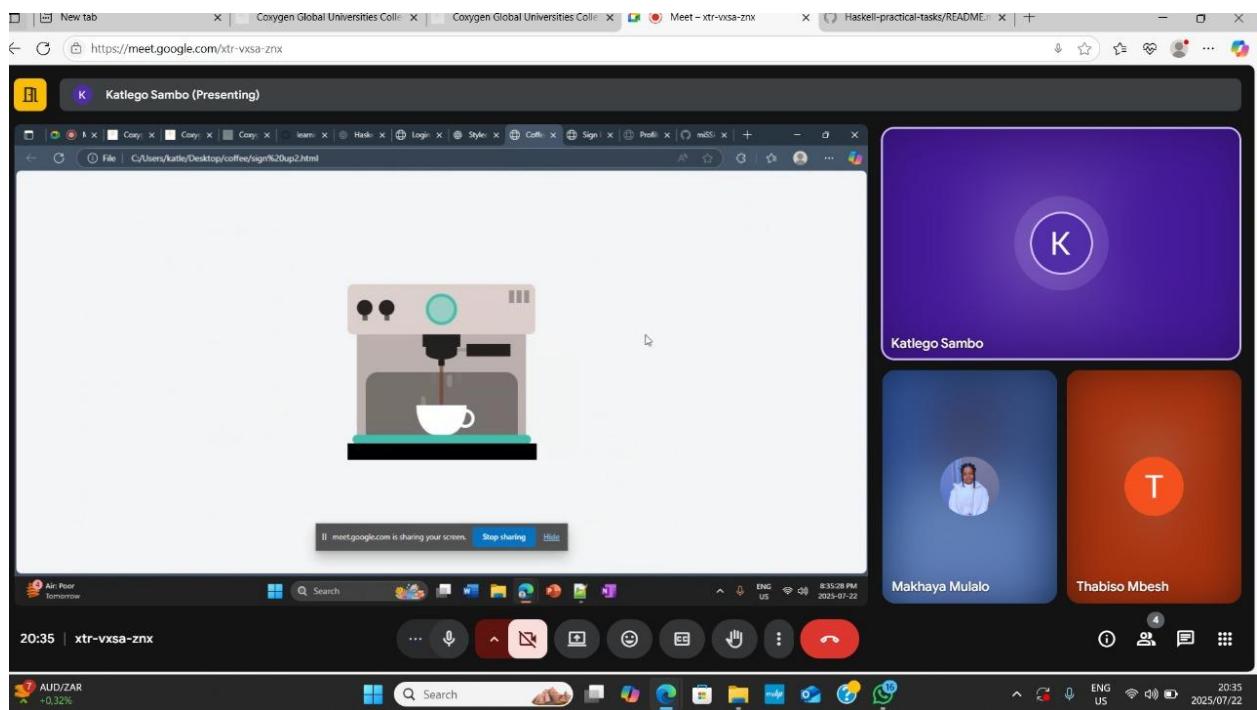

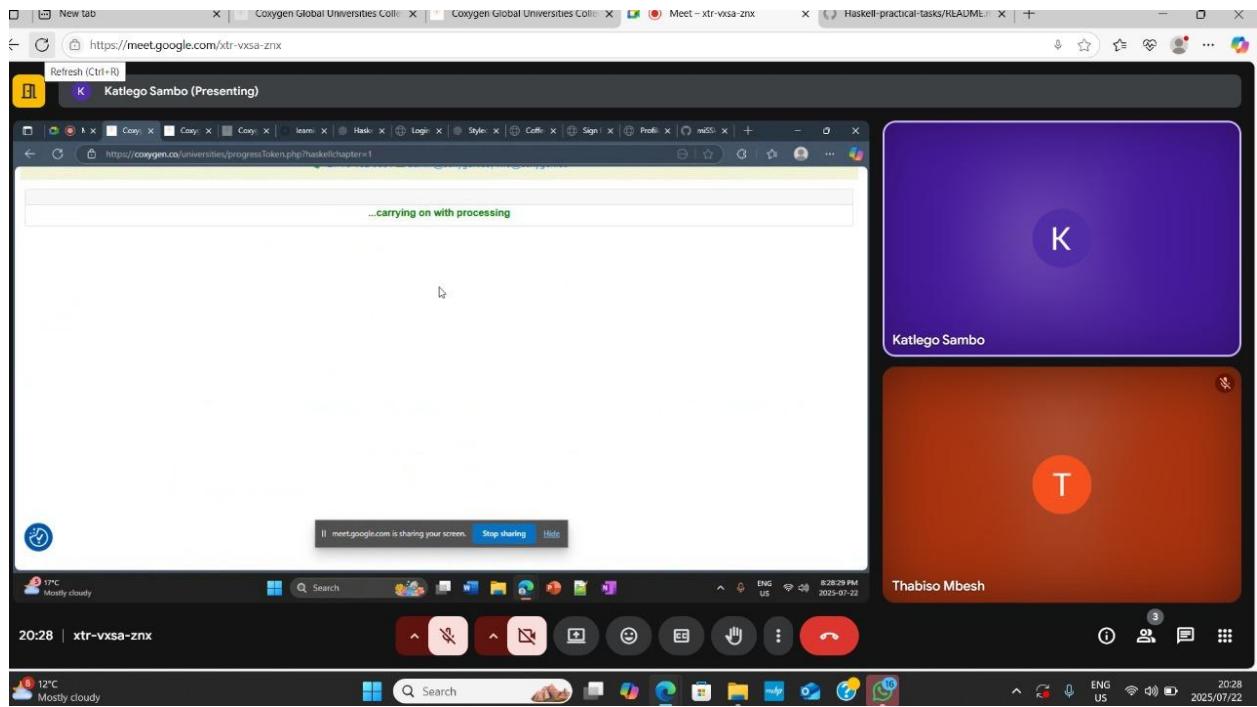

- Created coding challenges based on the topics:
 - Chapter 10: Creating Type Classes and Instances
 - Chapter 11: Basic Input/Output
 - Chapter 12: Installing Haskell and Making Our First Program
- Each challenge encouraged learners to build real-world demo console apps to help them understand the concepts better.

Activities Delivered 22 July

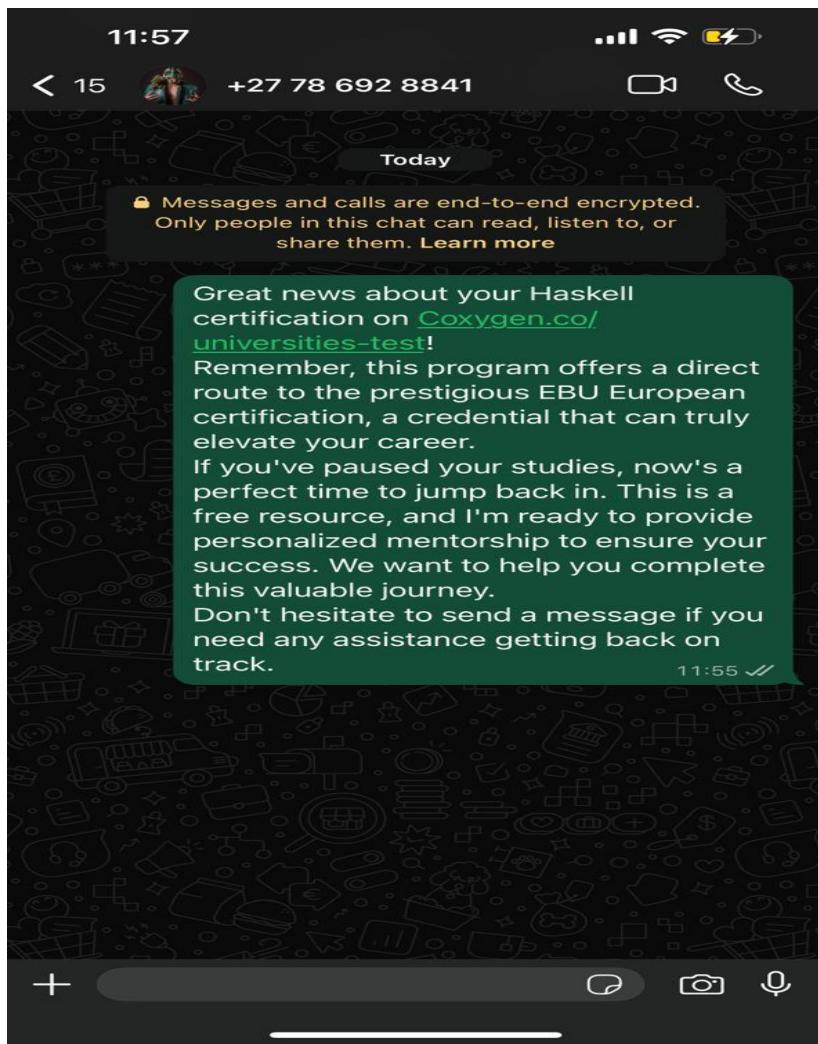

Attendance Summary 22 July: Present: Makhaya Mulalo, Sambo Katlego

- Guided learners through setting up the new mobile app step by step.
- Reviewed and finished Chapter 1 lessons and practical tasks.
- Covered the basics of Chapter 2 .
