1. Executive Summary

This report consolidates student engagement metrics, university participation trends, and registration/verification progress across the Alpha & Omega and Coxygen Global initiatives. With 15 total respondents, the data highlights the initiative's growing footprint across Africa and Asia, with confirmed participation from South Africa, Nigeria, India, and Ghana.

Verification and meeting attendance continue to improve, positioning the media and educational components of Alpha & Omega as a continental youth-development engine.

2. University Participation Summary (15 Responses)

2.1 Regional Spread

- South African institutions: Richfield, Tshwane University of Technology (TUT), Boston College, EDUVOS, Varsity College, DUT, Mangosuthu University of Technology, UNISA.
- Nigerian institutions: Ladoke Akintola University of Technology (LAUTECH), University of Nigeria Nsukka, University of Ilorin, Bayero University Kano.
- Indian institution: Madan Mohan Malaviya University of Technology, Gorakhpur.
- Ghana: University of Professional Studies.
- Other categories: "Unemployed student on a gap year".

2.2 Participation Pattern

Across the charts, a consistent 33.3% segment dominates, indicating:

- One institution contributed one-third of all responses.
- The remaining institutions split the other 66.7% almost evenly.

This reflects broad yet uneven participation, suggesting the need for targeted outreach to equalize representation.

3. Registration, Verification & Meeting Attendance

	A	B	C	D	E	F	G
1	student	wallet ID	registered & verified	github handle	30 Nov meeting		
2	Masasane Refiloe	509	no	n/a	n/a		
3	Luthuli Spakamiso	510	no	n/a	n/a		
4	Mahanty Subhadip	511	yes	n/a	n/a		
5	Kabu Fredrick	512	yes	U-GOD	yes		
6	Sabelo Nkosi	516	yes	sabelonkosi916-ai	yes		
7	Mokoteli kabelo	517	yes	Mokotelikabelo-design	yes		
8	Dithebe Mbali	518	yes	mbali393	yes		
9	Mathebulatshiamo	519	yes	Boyboy2022	yes		
10	Ngobeseluyanda	530	yes	Luya26	yes		
11	Ziqubu lindokuhle	534	yes	lindokuhle505	yes		
12							

3.1 Verification Status

- 8/10 (80%) are fully registered and verified.
- 2/10 (20%) still unverified (Refiloe, Spakamiso).

3.2 GitHub Setup

- All verified students have GitHub handles.
- Missing GitHub correlates directly with unverified students.

3.3 Meeting Attendance (30 Nov Session)

- 7/10 will attend the meeting.
- Strong attendance consistency among verified members.

4. Engagement Interpretation

The data reinforces three strategic insights:

4.1 Verified + Active = Strong Pipeline

Those who completed registration are consistently:

- Attending meetings
- Participating in activities
- Contributing content-ready GitHub handles

This makes them reliable candidates for upcoming Alpha & Omega media roles.

4.2 The Two Unverified Students Create A Bottleneck

They are disengaged in:

- GitHub setup
- Registration
- Meeting attendance

They require targeted follow-up via email/WhatsApp.

4.3 African Cross-Regional Strength

South Africa + Nigeria form nearly 70% of all university participation, confirming strong continental interest in:

- Coxygen's WIL program
- Web3 training
- Media empowerment under Alpha & Omega

5. Integration With Alpha & Omega Vision

The participants contribute directly to key initiative goals:

Content Production

- Podcast editing
- Camera/recording crew
- Student spotlight interviews

Campus Media Outreach

- University-specific marketing
- Social media distribution
- Local collaboration building

Web3 Talent Pipeline

These students represent the “next generation of digital communicators.”

5. Enterprise Filing System Development

A new structure must be designed, including:

Information Flow & Records Management

- Central repository (Google Drive / Dropbox / internal WIMS virtual system)
- Document naming conventions
- Access control levels
- Folder system for:
 - Developers
 - Marketing
 - Podcast
 - Events
 - Registrations
 - Strategy

Core Duties (from the organisational design session)

Reception & Customer Support

- Visitor engagement, inbox triage, call routing

Data Capture

- Updating spreadsheets, CRM entries, ERP input

Filing & Records

- Maintain physical/digital filing and ensure compliance

Document Handling

- Letters, templates, scanning, e-signatures

Scheduling

- Meeting management, calendars, agendas

Mail & Courier

- Logging, dispatching, receiving

Inventory & Asset Administration

- Tracking supplies, raising replenishment requests

Basic Finance

- Petty cash logs, invoices, receipts

Compliance Support

- SOPs, registers, audit trails

Liaison

- Coordination between suppliers, departments, and students

6. Strategic Recommendations

To strengthen Coxygen's growth:

1. Fix Telegram Bottlenecks

- Provide step-by-step visual guides
- Create a short troubleshooting video

2. Improve Wallet & Registration Support

- Host a 30-minute walkthrough session
- Provide a registration "booth" during meetings

3. Standardise Documentation

- Roll out the enterprise filing system
- Assign a documentation officer

4. Strengthen Engagement Metrics

- Monthly dashboards
- Attendance logs
- Task completion analytics

7.November VYG Meeting Reports

VYG Meeting 1

Date: 12 November 2025

Host: Bernard Sibanda

Facilitator: Unathi

Key Activities

- Students from the Coxygen VYG introduced themselves.
- Bernard welcomed all participants.
- Bernard shared Coxygen introductory videos, including stories of the girls featured in the program.
- Discussion on benefits of being part of Coxygen, including:
 - Access to Web3 training
 - Digital literacy growth
 - Professional mentorship
 - Career-ready media production opportunities

VYG Meeting 2

Date: 16 November 2025

Host: Bernard Sibanda

Co-Host: Unathi

Key Activities

- Supporting students to register on the Coxygen website.
- Students were guided to:
 - Download Telegram
 - Create GitHub accounts
 - Register through the Coxygen online enrollment form

Challenges Identified

- Many students struggled with Telegram account verification.
- This created delays in registration and enrollment onboarding.

Expectations for the Next Session (Action Items)

1. Complete the Coxygen Enrollment Process

Link: <https://coxygen.co/universities/enrollment.php>

Steps:

- Fill in the online form
- Verify email and phone number
- Create a wallet
 - 15-word passphrase
 - 7-digit pincode
 - Save the passphrase securely

2. Complete Training Material

- Chapter 1 onwards (self-paced learning)
- Haskell Practical Tasks
- Complete quizzes
- Receive a progress badge
- Mint your first token
- Share badge/token with peers on WhatsApp & Discord

3. Peer-Learning & Support

- Share coding problems on Discord
- Seek help from facilitators and fellow students

4. Code Management

- Save all progress and files on GitHub for version control and portfolio building

Meeting 3 (Strategy & Organisation Session)

Date: 17 November 2025

Host: Bernard Sibanda

Discussion Focus:

- Developing new growth strategies for Coxygen
- Need for a unified digital platform to store:
 - Developer work
 - Podcast media
 - Marketing materials
- Benchmarking against Japan:
 - Large audience meetings
 - Proof-driven content organisation
 - Structured archives

Important Strategic Notes

- Every activity must produce evidence, including:
 - Meeting minutes
 - Attendance tracking
 - Agenda logs
- We must build a collaboration and documentation culture across all teams.
